A. Accounting Practices

The financial statements of The Hanover Insurance Company ("the Company") are presented on the basis of accounting practices prescribed or permitted by the State of New Hampshire Insurance Department.

The State of New Hampshire Insurance Department recognizes only statutory accounting practices prescribed or permitted by the State of New Hampshire for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the New Hampshire Insurance Law. The National Association of Insurance Commissioners ("NAIC") "Accounting Practices and Procedures Manual" ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of New Hampshire. The State has not adopted any prescribed accounting practices that differ from those found in NAIC SAP.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

- (1) Short-term investments are stated at amortized cost.
- (2) Bonds not backed by loans are stated at either amortized cost or fair value, using the scientific interest method, in accordance with the NAIC Purposes and Procedures of the Securities Valuation Office ("SVO").
- (3,4) Preferred stocks that are subject to a 100% mandatory sinking fund are carried at amortized cost. All other preferred stocks and common stocks are carried at fair value, except investments in stocks of unconsolidated subsidiaries and affiliates in which the Company has an interest of 10% or more are carried using the equity method.
- (5) Mortgage loans on real estate are stated at unpaid principal balances net of unamortized discounts, premiums, and other adjustments. Mortgage loans are reduced for losses expected by management to be realized on transfers of mortgage loans to real estate (upon foreclosure), on the disposition or settlement of mortgage loans and on mortgage loans which the Company believes may not be collectible in full. In determining the amount of loss, management considers, among other things, the estimated fair value of the underlying collateral.
- (6) Loan-backed securities are stated at either amortized cost or fair value, in accordance with the NAIC Purposes and Procedures of the SVO.
- (7) The Company owns 100% of the common stock of Allmerica Financial Alliance Insurance Company ("AFAIC"), Allmerica Financial Benefit Insurance Company ("AFBIC"), The Hanover American Insurance Company ("American"), The Hanover Atlantic Insurance Company Ltd. ("Atlantic"), The Hanover Casualty Company ("Hanover Casualty"), Massachusetts Bay Insurance Company ("Mass Bay"), Citizens Insurance Company of America ("CICA"), Citizens Insurance Company of the Midwest ("CICM"), Citizens Insurance Company of Ohio ("CICO"), The Hanover New Jersey Insurance Company ("New Jersey"), Verlan Fire Insurance Company ("Verlan"), The Hanover National Insurance Company ("National"), Campmed Casualty and Indemnity Company, Inc. ("Campmed"), and Nova Casualty Company ("NOVA"), all of which are insurance subsidiaries. The Company owns 100% of the common stock of Professionals Direct Inc. ("PDI"), AIX, Inc. ("AIX"), and Allmerica Plus Insurance Agency ("APIA"), which are non-insurance subsidiaries. All subsidiaries are carried using the equity method.
- (8) Other invested assets, including investments in trusts, are recorded using the equity method in accordance with the Statement of Statutory Accounting Principles ("SSAP") No. 48, "Joint Ventures, Partnerships and Limited Liability Companies". Investments in affiliated entities are recorded based on its underlying audited GAAP equity balances in accordance with the SSAP 97, "Investments in Subsidiary, Controlled, and Affiliated Entities, A Replacement of SSAP 88". Commercial mortgage loan participations are recorded at outstanding principal balance of the loan per SSAP 21, "Other Admitted Assets".
- (9) The Company has not entered into derivative contracts.
- (10) The Company does utilize anticipated investment income as a factor in the premium deficiency calculation.
- (11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported ("IBNR"). Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.
- (12) The Company has not modified its capitalization policy from the prior year.
- (13) The Company does not write major medical insurance with prescription drug coverage.

NOTES TO FINANCIAL STATEMENTS

NOTE 12 Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Postretirement Benefit Plans

The labor for all domestic THG companies is provided and paid for by the Company.

The Company, as the common employer for all domestic affiliated Companies, provided multiple benefit plans to employees and agents of these affiliated Companies, including retirement plans. The salaries of employees and agents covered by these plans and the expenses of these plans are charged to the affiliated Companies in accordance with an intercompany cost sharing agreement.

A. Defined Benefit Plan

Prior to 2005, THG provided retirement benefits to substantially all of its employees under defined benefit pension plans. These plans were based on a defined benefit cash balance formula, whereby the Company annually provided an allocation to each covered employee based on a percentage of that employee's eligible salary, similar to a defined contribution plan arrangement. Prior to 2005, THG provided retirement benefits to substantially all of its employees under defined benefit pension plans. These plans were based on a defined benefit cash balance formula, whereby the Company annually provided an allocation to each covered employee based on a percentage of that employee's eligible salary, similar to a defined contribution plan arrangement. In addition to the cash balance allocation, certain transition group employees who had met specified age and service requirements as of December 31, 1994 were eligible for a grandfathered benefit based primarily on each employee's years of service and compensation during their highest five consecutive plan years of employment. The Company's policy for the plans is to fund at least the minimum amount required by the Employee Retirement Income Security Act of 1974 ("ERISA").

As of January 1, 2005, the defined benefit pension plans were frozen and since that date, no further cash balance allocations have been credited to participants. Participants' accounts are credited with interest daily, based upon the General Agreement of Trades and Tariffs rate (the 30-year Treasury Bond interest rate). In addition, the grandfathered benefits for the transition group were also frozen at January 1, 2005 levels with an annual transition pension adjustment calculated at an interest rate equal to 5% per year up to 35 years of completed service, and 3% thereafter. As of December 31, 2022, based on current estimates of plan liabilities and other assumptions, the assets of the qualified defined benefit pension plan exceeded the projected benefit obligation by approximately \$9.8 million.

B. Plan Assets

For the qualified defined benefit plan, a target allocation approach is utilized, which focuses on creating a mix of assets that will generate modest growth from equity securities while minimizing volatility from changes in the markets and economic environment. Various factors are taken into consideration in determining the appropriate asset mix, such as census data, actuarial valuation information and capital market assumptions. Target allocations are reviewed and updated at least annually. Changes are made periodically.

The following table provides its year-end 2022 target allocations and actual invested asset allocations at December 31, 2022 and 2021.

	2022 TARGET LEVELS	2022	2021
Fixed Income Securities			
Fixed maturities	88%	88%	88%
Money Market Funds	2%	2%	1%
Total Fixed Income Securities	90%	90%	89%
Equity Securities	10%	10%	11%
Total Plan Assets	100%	100%	100%

C. The fair value of each class of plan assets

(1) The following table presents, for each hierarchy level, the qualified defined benefit plan's investment assets that are measured at fair value at December 31, 2022

	(Level 1)	(Level 2)	(Level 3)	Total
Fixed income securities:				
Fixed Maturities	\$ 28,231	\$ -	\$ 14,426	\$ 42,657
Money Markets	\$ 6,515	\$ -	\$ -	\$ 6,515
Total Investments at fair value	\$ 34,746	\$ -	\$ 14,426	\$ 49,172

(2) Securities classified as Level 1 at December 31, 2022 include actively traded mutual funds and U.S. Treasury Bonds, which are valued at quoted market prices. Securities classified as Level 3 at December 31, 2022 includes assets held in a fixed account of an insurance company. The fair value of the investment is estimated using a comparable public market financial institution derived fair value curve that uses non-observable inputs for market liquidity and unique credit characteristics of its underlying securities.

The Plan also holds investments measured at fair value using NAV based on the value of the underlying investments, which is determined independently by the investment manager and have not been included in the table above. These include cash, investments in commingled pools and investment-grade fixed income securities held in a custom fund, and other commingled pools that primarily invest in publicly traded common stocks and international equity securities. The daily NAV, which is not published as a quoted market price for these investments, is used as the basis for transactions. Redemption of these funds is not subject to restriction.

D. The expected rates of return were determined by using historical mean returns for each asset class, adjusted for certain factors believed to have an impact on future returns. These returns are generally weighted to the plan's actual asset allocation, and are net of administrative expenses. For the qualified defined benefit plan, the 2022 expected return on plan assets of 3.75% reflects long-term expectations and is consistent with the prior year based upon long-term market expectations and expense management efforts. The Company reviews and updates, at least annually, its expected return on plan assets based on changes in the actual assets held by the plan and market conditions.

E. Defined Contribution Plan

In addition to the defined benefit plans, THG provides a qualified defined contribution 401(k) plan for all of its employees, whereby the Company matches employee elective 401(k) contributions, up to a maximum of 6% of eligible compensation in 2022 and 2021. The Company's expense for this matching provision was \$26.4 million and \$25.2 million for 2022 and 2021, respectively. In addition to this matching provision, the Company can elect to make an annual contribution to employees' accounts. There were no additional contributions for the 2022 plan year.

c. Transfers into Level 3 are attributable to changes in preferred stock carrying value based on the lower of fair value or call price and other invested assets carried at fair value. Additionally, transfers out of Level 3 are attributable to observable inputs on the fair value measurement of a preferred stock.

(3) The reporting entity's policy is to recognize transfers in and transfers out as of the actual date of the event or change in circumstances that caused the transfer.

(4) For fair value measurements categorized within Level 2 of the fair value hierarchy, fair values of bonds are obtained by a quoted market price if available, otherwise, fair values are estimated using independent pricing sources or internally developed pricing models using discounted cash flow analyses.

The Company utilizes a third party pricing service for the valuation of the majority of its fixed maturity securities and receives one quote per security. When quoted market prices in an active market are available, they are provided by the pricing service as the fair value and such values are classified as Level 1. Since fixed maturities other than U.S. Treasury securities generally do not trade on a daily basis, the pricing service prepares estimates of fair value for those securities using pricing applications based on a market approach. Inputs into the fair value pricing applications which are common to all asset classes include benchmark U.S. Treasury security yield curves, reported trades of identical or similar fixed maturity securities, broker/dealer quotes of identical or similar fixed maturity securities and structural characteristics of the security, such as maturity date, coupon, mandatory principal payment dates, frequency of interest and principal payments and optional principal redemption features. Inputs into the fair value applications that are unique by asset class include, but are not limited to:

- U.S. government – determination of direct versus indirect government support and whether any contingencies exist with respect to the timely payment of principal and interest.

NOTES TO FINANCIAL STATEMENTS

- All other governments – estimates of appropriate market spread versus underlying related sovereign treasury curves dependent on liquidity and direct or contingent support.
- Corporate bonds, which are included in Industrial and miscellaneous bonds - overall credit quality, including assessments of the level and variability of: economic sensitivity; liquidity; corporate financial policies; management quality; regulatory environment; competitive position; ownership; restrictive covenants; and security or collateral.
- Municipal bonds, which are included in States, territories and possessions; Political subdivisions of states, territories and possessions; and Special revenue and special assessment obligations - overall credit quality, including assessments of the level and variability of: sources of payment such as income, sales or property taxes, levies or user fees; credit support such as insurance; state or local economic and political base; natural resource availability; and susceptibility to natural or man-made catastrophic events such as hurricanes, earthquakes or acts of terrorism.
- Residential mortgage-backed securities, U.S. agency pass-thrus and collateralized mortgage obligations (“CMOs”) which are included in U.S. governments and Special revenue and special assessment obligations - estimates of prepayment speeds based upon: historical prepayment rate trends; underlying collateral interest rates; geographic concentration; vintage year; borrower credit quality characteristics; interest rate and yield curve forecasts; government or monetary authority support programs; tax policies; and delinquency/default trends.
- Residential mortgage-backed securities, non-agency CMOs, which are included in Industrial and miscellaneous bonds - estimates of prepayment speeds based upon: historical prepayment rate trends; underlying collateral interest rates; geographic concentration; vintage year; borrower credit quality characteristics; interest rate and yield curve forecasts; government or monetary authority support programs; tax policies; delinquency/default trends; and severity of loss upon default and length of time to recover proceeds following default.
- Commercial mortgage-backed securities, which are included in Industrial and miscellaneous bonds - overall credit quality, including assessments of the value and supply/demand characteristics of: collateral type such as office, retail, residential, lodging, or other; geographic concentration by region, state, metropolitan statistical area and locale; vintage year; historical collateral performance including defeasance, delinquency, default and special servicer trends; and capital structure support features.
- Asset-backed securities, which are included in Industrial and miscellaneous bonds – overall credit quality, including assessments of the underlying collateral type such as credit card receivables, auto loan receivables and equipment lease receivables; geographic diversification; vintage year; historical collateral performance including delinquency, default and casualty trends; economic conditions influencing use rates and resale values; and contract structural support features.

Generally, all prices provided by the pricing service, except actively traded securities with quoted market prices, are reported as Level 2.

The Company holds privately placed corporate bonds and certain other bonds that do not have an active market and for which the pricing service cannot provide fair values. The Company determines fair values for these securities using either matrix pricing or broker quotes. The Company will use observable market data to the extent it is available, but is also required to use a certain amount of unobservable judgment due to the illiquid nature of the securities involved. Additionally, the Company may obtain nonbinding broker quotes which are reported as Level 3.

Fair values of common and preferred stocks are based on SVO valuation, if available. If SVO valuations are not available, quoted market prices are used. If neither SVO prices nor quoted market prices are available, fair values are estimated using independent pricing sources or internally developed pricing models using discounted cash flow analyses.

Level 2 includes securities that are valued using pricing for similar securities and pricing models that incorporate observable inputs. Level 3 consists of common stock of private companies for which observable inputs are not available. The Company uses a third party pricing service for the valuation of the majority of its equity securities. When quoted market prices in an active market are available, they are provided by the pricing service as the fair value and such values are classified as Level 1. Generally, all prices provided by the pricing service except quoted market prices, are reported as Level 2. Occasionally, the Company may obtain nonbinding broker quotes which are reported as Level 3.

NOTE 21 Other Items

A. Unusual or Infrequent Items

On November 3, 2021, the Michigan Catastrophic Claims Association (“MCCA”) Board voted unanimously to return approximately \$3.0 billion of its estimated surplus to policyholders through its member insurance companies. The action occurred because the association’s surplus was deemed to have increased beyond a level necessary to cover its expected losses and expenses. Because policyholders are the ultimate payers of the MCCA premium, this return of MCCA surplus passed through to policyholders. The refund was paid to policyholders and fully resolved by Q2 2022. The refund due policyholders was recorded as an aggregate write-in liability and the refund receivable was recorded as an aggregate write-in asset in the Company’s financial statements. There is no effect on surplus or the income statement

C. Other Disclosures

IBNR loss and loss adjustment expense reserves are allocated to the Company based on the proportion of the Company's earned premiums and case loss reserves relative to other affiliates in The Hanover Insurance Group. Fluctuations by affiliate and state may occur as a result of this re-estimation process.

The Company elected to use rounding to the nearest dollar in reporting amounts in the Statement, except as otherwise directed by instructions.

At the end of the current period and prior year, the Company had admitted assets of \$1,340,094,622 and \$1,204,356,753, respectively, in premiums receivable due from policyholders, agents and ceding insurers. The Company routinely assesses the collectability of these receivables. Based upon Company experience, any uncollectible premiums receivable at the end of the current period are not expected to exceed the non admitted amounts totaling \$23,998,034 and, therefore, no additional provision for uncollectible amounts has been recorded. The potential for any additional loss is not believed to be material to the Company's financial position.

The Company reported \$178,453,073 on Page 2 Line 15.1 for Agents' balances or Uncollected Premiums. There are no agents' balances or uncollected premiums due from controlled or controlling persons.

NOTE 25 Change in Incurred Losses and Loss Adjustment Expenses

A. The estimated cost of loss and loss adjustment expenses ("LAE") attributable to insured events of prior year's decreased by \$10,583,567 during 2022. The redundancy of \$10,583,567 is 0.2% of unpaid losses and LAE of \$4,360,370,827 as of December 31, 2021. The favorable loss and LAE reserve development during 2022 is primarily due to lower than expected personal auto, workers' compensation, other liability and commercial multiple peril lines of business losses in accident year 2020, partially offset by higher than expected losses in personal auto, homeowners, and workers' compensation lines of business in accident year 2021. Increases or decreases of this nature occur as a result of claim settlements during the current year, and as additional information is received regarding individual claims, causing changes from the original estimates of the cost of these claims. Recent loss development trends are also taken into account evaluating the overall adequacy of unpaid losses and LAE.

B. There were no significant changes in methodologies and assumptions used in calculating the liability for unpaid property and casualty losses and loss adjustment expenses.

ANNUAL STATEMENT FOR THE YEAR 2022 OF THE HANOVER INSURANCE COMPANY

GENERAL INTERROGATORIES

PART 2 - PROPERTY AND CASUALTY INTERROGATORIES

- 6.1 What provision has this reporting entity made to protect itself from an excessive loss in the event of a catastrophe under a workers' compensation contract issued without limit of loss?
The Company maintains workers compensation coverage under the casualty excess of loss reinsurance agreement.
- 6.2 Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process.
The Company uses multiple models including RMS v18.1 and AIR Touchstone v8 Catastrophe Modeling software packages to estimate the Company's probable maximum loss. These exposures are a combination of personal and commercial property risks. The major concentration of losses is in the Northeast.
- 6.3 What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?
Effective July 1, 2022, we have catastrophe protection through a per occurrence excess of loss reinsurance agreement with Commonwealth Re Ltd. ("Commonwealth Re"), an independent company, licensed as a Special Purpose Insurer in Bermuda. The reinsurance agreement meets the requirements to be accounted for as reinsurance in accordance with the guidance for reinsurance contracts. In connection with the reinsurance agreement, Commonwealth Re issued notes (generally referred to as "catastrophe bonds") to investors in amounts totaling \$150 million, consistent with the amount of coverage provided under the reinsurance agreement as described below. The proceeds were deposited in a reinsurance trust account. The reinsurance agreement provides us with coverage of up to \$150 million through June 30, 2025, for catastrophe losses from named tropical storms or hurricanes, including all events or perils directly resulting from such storm or storm system, which may include, by way of example and not limitation, hurricane, wind, gusts, typhoon, hail, rain, tornadoes, cyclones, ensuing flood, storm surge, water damage, fire following, sprinkler leakage, riots, vandalism, and collapse. For events up to and including June 30, 2025, we are entitled to begin recovering amounts under this reinsurance agreement if the covered losses in the covered area for a single occurrence reach an initial attachment amount of \$1.3 billion. The full \$150 million coverage amount is available until such covered losses reach a maximum \$1.45 billion. The attachment level and the maximum level (or exhaustion level) under this agreement may be reset annually to adjust the expected loss of the layer within a predetermined range. The coverage under the reinsurance agreement is limited to specified personal and commercial property coverage written in the following geographies in the United States: Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont and Virginia. Additionally, The Hanover has traditional reinsurance coverage which provides \$1.1 billion of occurrence reinsurance limit excess of \$200 million, placed at 100%. Plus, there is an additional \$150 million of traditional occurrence reinsurance limit at the top of the reinsurance structure, placed at 33.34%. Lastly, The Hanover opted not to renew the former top-and-aggregate structure at 07/01/2022 which provided aggregate reinsurance coverage for \$75 million excess of \$250 million (aggregate) and/or occurrence coverage for \$75 million excess of \$1.1 billion (top).
- 6.4 Does the reporting entity carry catastrophe reinsurance protection for at least one reinstatement, in an amount sufficient to cover its estimated probable maximum loss attributable to a single loss event or occurrence? Yes No
- 6.5 If no, describe any arrangements or mechanisms employed by the reporting entity to supplement its catastrophe reinsurance program or to hedge its exposure to uninsured catastrophic loss.
.....
- 7.1 Has this reporting entity reinsured any risk with any other entity under a quota share reinsurance contract that includes a provision that would limit the reinsurer's losses below the stated quota share percentage (e.g., a deductible, a loss ratio corridor, a loss cap, an aggregate limit or any similar provisions)?..... Yes No
- 7.2 If yes, indicate the number of reinsurance contracts containing such provisions: 4
- 7.3 If yes, does the amount of reinsurance credit taken reflect the reduction in quota share coverage caused by any applicable limiting provision(s)?..... Yes No
- 8.1 Has this reporting entity reinsured any risk with any other entity and agreed to release such entity from liability, in whole or in part, from any loss that may occur on this risk, or portion thereof, reinsured? Yes No
- 8.2 If yes, give full information
.....
- 9.1 Has the reporting entity ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or its affiliates) for which during the period covered by the statement: (i) it recorded a positive or negative underwriting result greater than 5% of prior year-end surplus as regards policyholders or it reported calendar year written premium ceded or year-end loss and loss expense reserves ceded greater than 5% of prior year-end surplus as regards policyholders; (ii) it accounted for that contract as reinsurance and not as a deposit; and (iii) the contract(s) contain one or more of the following features or other features that would have similar results:

(b) A limited or conditional cancellation provision under which cancellation triggers an obligation by the reporting entity, or an affiliate of the reporting entity, to enter into a new reinsurance contract with the reinsurer, or an affiliate of the reinsurer;
(c) Aggregate stop loss reinsurance coverage;
(d) A unilateral right by either party (or both parties) to commute the reinsurance contract, whether conditional or not, except for such provisions which are only triggered by a decline in the credit status of the other party;
(e) A provision permitting reporting of losses, or payment of losses, less frequently than on a quarterly basis (unless there is no activity during the period); or
(f) Payment schedule, accumulating retentions from multiple years or any features inherently designed to delay timing of the reimbursement to the ceding entity. Yes No
- 9.2 Has the reporting entity during the period covered by the statement ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or its affiliates), for which, during the period covered by the statement, it recorded a positive or negative underwriting result greater than 5% of prior year-end surplus as regards policyholders or it reported calendar year written premium ceded or year-end loss and loss expense reserves ceded greater than 5% of prior year-end surplus as regards policyholders; excluding cessions to approved pooling arrangements or to captive insurance companies that are directly or indirectly controlling, controlled by, or under common control with (i) one or more unaffiliated policyholders of the reporting entity, or (ii) an association of which one or more unaffiliated policyholders of the reporting entity is a member where:
(a) The written premium ceded to the reinsurer by the reporting entity or its affiliates represents fifty percent (50%) or more of the entire direct and assumed premium written by the reinsurer based on its most recently available financial statement; or
(b) Twenty-five percent (25%) or more of the written premium ceded to the reinsurer has been retroceded back to the reporting entity or its affiliates in a separate reinsurance contract. Yes No

2. The definition of allocated loss adjustment expenses (ALAE) and, therefore, unallocated loss adjustment expenses (ULAE) was changed effective January 1, 1998. This change in definition applies to both paid and unpaid expenses. Are these expenses (now reported as "Defense and Cost Containment" and "Adjusting and Other") reported in compliance with these definitions in this statement? Yes [X] No []
3. The Adjusting and Other expense payments and reserves should be allocated to the years in which the losses were incurred based on the number of claims reported, closed and outstanding in those years. When allocating Adjusting and Other expense between companies in a group or a pool, the Adjusting and Other expense should be allocated in the same percentage used for the loss amounts and the claim counts. For reinsurers, Adjusting and Other expense assumed should be reported according to the reinsurance contract. For Adjusting and Other expense incurred by reinsurers, or in those situations where suitable claim count information is not available, Adjusting and Other expense should be allocated by a reasonable method determined by the company and described in Interrogatory 7, below. Are they so reported in this Statement? Yes [X] No []
4. Do any lines in Schedule P include reserves that are reported gross of any discount to present value of future payments, and that are reported net of such discounts on Page 10? Yes [X] No []

If yes, proper disclosure must be made in the Notes to Financial Statements, as specified in the Instructions. Also, the discounts must be reported in Schedule P - Part 1, Columns 32 and 33. Schedule P must be completed gross of non-tabular discounting. Work papers relating to discount calculations must be available for examination upon request.
 Discounting is allowed only if expressly permitted by the state insurance department to which this Annual Statement is being filed.

5. What were the net premiums in force at the end of the year for:
 (in thousands of dollars)
- | | |
|--------------------|--------|
| 5.1 Fidelity | 54,225 |
| 5.2 Surety | 88,381 |

6. Claim count information is reported per claim or per claimant (Indicate which)per claimant.....
 If not the same in all years, explain in Interrogatory 7.
- 7.1 The information provided in Schedule P will be used by many persons to estimate the adequacy of the current loss and expense reserves, among other things. Are there any especially significant events, coverage, retention or accounting changes that have occurred that must be considered when making such analyses? Yes [X] No []
- 7.2 (An extended statement may be attached.)

SCHEDULE P INTERROGATORIES – ATTACHMENT

7.2

Other Items:

- A) Individual case reserves are maintained for a portion of unpaid defense and cost containment expenses for certain lines of business. The remainder of loss adjustment reserves for reported claims are actuarially established and reported as IBNR.
- B) Larger than expected catastrophe losses were experienced during accident years 2012, 2017, 2021 and 2022.
- C) During 2016, the Company experienced increased unfavorable development as a result of its fourth quarter 2016 actuarial reserve review, primarily related to long-tailed commercial liability coverages. In general, the higher than expected loss and LAE emergence in 2016 led the Company to adjust its reserve assumptions in its year-end reserve review and place greater weight on the adverse severity trends experienced in the most recent calendar years.
- D) During 2017, the Company experienced increased unfavorable development in the Accident and Health line of business on both a gross and discounted basis, primarily due to the Company's participation in a long-term care pool, which is in runoff. During the fourth quarter of 2017, the Company received updated future cash flow projections from the manager of the long-term care pool that reflected a significant increase in projected claim costs. As a result of this deterioration, 2017 Schedule P Part 2 reflected an increase in gross reserve development of \$90 million, including increases in the tabular discount of approximately \$60 million and net reserves of approximately \$30 million for the long-term care pool. During 2018, upon management's re-assessment of current and future projected cash flow projections for the long-term care pool, as well as other discount assumptions, the Company reduced its net Accident and Health reserves by approximately \$10 million. 2018 Schedule P Part 2 reflects this decrease in gross reserves in addition to a change in the tabular discount of approximately \$20 million.
- E) Lower than expected personal auto losses were experienced in accident year 2020 due to fewer accidents and decreased claim activity resulting from fewer miles driven as a result of the Pandemic.
